

Jeffrey Serio, System Administrator / DevOps

Palatine, Illinois, United States, hyperreal@moonshadow.dev

PROFILE

Skilled system administrator and DevOps specialist who is passionate about free and open source technology. I spend the majority of my time doing sysadmin and DevOps things.

Unfortunately I have zero years of work experience in the industry, and I'm hoping to change that. All of my work can be found on my website, Gitea, and GitHub:

- <https://hyperreal.coffee>
- <https://git.hyperreal.coffee>
- <https://github.com/hyperreal64>.

I'm a people-pleaser, so having good "soft skills" is important to me.

Due to disability, I can only do remote work.

EDUCATION

Dec 2018

Bachelor of Science in Computer Science, University of Illinois-Springfield

Springfield, Illinois

As part of my computer science coursework, I studied networking, intrusion detection systems, and object-oriented programming languages like Java and C#. I minored in philosophy.
